DETAILED ACTION

Reasons for Allowance

1. ***The following is an examiner's statement of reasons for allowance:*** In response to the Office action dated April 08, 2009, and further to applicant's amendments and/or remarks filed November June 26, 2003, the application has been reviewed and respectfully considered.

According to applicant's response independent claims 1, 15 and 16 have been amended or/and written to include the subject matter contained in now canceled claims 17-19, these claims were indicated previously as containing allowable subject matter. Claims 17-19, have been cancelled. Claims 1-16 are currently pending and carefully reviewed and a search has been updated. Accordingly, no reference has been found to reasonably read on the claimed invention.

Therefore, claims 1 through 16 are considered allowable since when reading the claims in light of the specification, as per MPEP §2111.01 or *Toro Co. v. White Consolidated Industries Inc.*, 199 F.3d 1295, 1301, 53 USPQ2d 1065, 1069 (Fed. Cir. 1999), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claims 1, 15, and 16, as further discussed below:

Referring to claims 1 through 14, the prior art searched and of record neither anticipates nor suggests a data processing device connected to and in communication with a terminal device, comprising: a storing unit having a storage area for storing image data; a recognition setting unit that enables the terminal device to recognize the storage area in the storing unit as an external storage device based on a determination that the storing device is available_or prevents the terminal device from recognizing the storage area in the storing unit as the external storage device based on a determination that the storing unit is unavailable; and a data processing unit that reads image data from the storage area in the storing unit when image data is written to the storage area from the terminal device and executes a prescribed process on the image data.

Referring to claim 15, the prior art searched and of record neither anticipates nor suggests a communicating unit connected to an external network and capable of transmitting and receiving facsimile data; and a data processing device connected to and in communication with a terminal device through the external network, the data processing device comprising: a storing unit having a storage area for storing the facsimile data; a recognition setting unit that enables the terminal device to recognize the storage area in the storing unit as an external storage device based on a determination that the storing unit is available or prevents the terminal device from recognizing the storage area in the storing unit as the external storage device based on a determination that the storing unit is unavailable; and a data processing unit that reads the facsimile data from the storage area in the storing unit when the facsimile

Art Unit: 2625

data is written to the storage area from the terminal device and executes a prescribed process on the facsimile data.

Referring to claim 16, the prior art searched and of record neither anticipates nor suggests a computer-readable storage medium that stores a computer-executable program for permitting a facsimile machine to function as a data processing device, the facsimile machine including a communication unit connected to a terminal device through a network, and a storing unit including a storage area that stores therein image data, the program comprising: instructions for enabling the terminal device to recognize the storage area in the storing unit as an external storage device based on a determination that the storing unit is available or prevents the terminal device from recognizing the storage area in the storing unit as the external storage device based on a determination that the storing unit is unavailable; and instructions for reading image data from the storage area in the storing unit when image data is written to the storage area from the terminal device and executing a prescribed process on the image data.

To the extent that these features are not found in the prior art cited by Examiner, the present case is held allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
